# idsuite

*IDSuite gives customers the peace of mind that they have*  
**the best mobile business solution**

*IDSuite is a multi-tiered software solution created to enhance a range of field service, proof of delivery and homecare applications*

The IDSuite product family will help you optimise and manage your mobile workforce by offering a range of web based, rapid deploy applications:

**IDPod, IDService, IDTrack, IDClean, IDSecure, IDPest and IDMeter.**

**IDSuite will help to build your competitive position, lower your operating costs, and assist you to keep ahead of your customer's requirements, and in front your competition!**

Unique ID's innovative use of modern mobile communications allows customers to work more effectively with their employees providing up to the minute management information via a secure hosted data service, so dramatically reducing the need for their customers to use internal IT resource.

With advanced, integrated hardware - Mobile Computers - IDSuite provides greater flexibility and using your resources more efficiently all adds up to greater productivity and cost effectiveness. IDSuite applications have immediate access to customer history, product data, orders, service inventory, fleet tracking, parts availability and much more.

It is a vital component for product-oriented organisations. In today's demanding service environment, quality service delivery from service request to dispatch, debrief and invoice, is essential for greater customer satisfaction. ID Suite enables us to provide our clients with an even better level of support.
