

## The MC Store

The NEW MC Store is a purpose built housing for mobile terminals. It provides the perfect environment to house, charge and even communicate with your install base of Motorola mobile devices.

The MC Store can charge up to 20 terminals and comes with built in Ethernet connectivity, its lockable doors provide secure storage.

The MC Store simplifies the majority of mobile device installations reducing both set up time and costs often associated with adding additional 240 volt power sockets required to charge up to 20 terminals. This central storage solution allows for quick and easy visual assessment of missing units whilst providing easy access to re-charged and communicate the terminals.

## *Terminals at your fingertips*

### Key Features

- **Ultra compact design** - Narrow footprint to minimize storage area whilst maximizing capacity . The base has been designed with a recess at the rear to allow the unit to be mounted against the wall fitted with skirting board. Fast access is available, via security screws to the hidden wiring board at the rear of the cabinet allowing for fast installation of peripherals and ongoing service.
- **Communications** – Dual Ethernet ports built in for redundancy for LAN based communications.
- **Secure Housing** – Dual pin lockable doors with clear shatter proof PETG panels. Built in key ways to allow for secure mounting to the wall (optional back to back plates available to allow cabinets to be linked)
- **Positive Air Pressure** – Designed to allow positive airflow for cooling and venting ensuring long life from your Motorola peripherals and units.
- **Construction** – A strong steel construction in a smart and durable powder coat finish and provides an attractive, neat solution. Available to order in any colour subject to order quantities.
- **Dimensions** – 680mm W x 322mm D x 1738mm L
