The UniStore Cabinet, a 'communication central' storage cabinet which offers mobile computer charging, storage and communication with the devices, is the perfect all-in-one solution.

Charge 'n store *terminals at your fingertips*

The UniStore Cabinet can charge 20/25 devices, have Bluetooth or Ethernet connectivity to all of the terminals and its lockable doors provide secure storage. They come in a variety of sizes, each shelf houses 4-5 mobile computers and doubles as a central storage location.

This central storage solution allows for quick and easy visual assessment of missing units and provides easy access to recharged terminals. The unit's strong steel construction in a smart and durable black powder coat finish provides an attractive, neat storage solution.

In one convenient location you can store your mobile computers, thus removing the problems associated with housing and charging a large number of mobile terminals.
